A MESSAGE FROM THE FOUNDATING DIRECTOR

Dear Friends,

As we close Term Two of 2025, I am deeply grateful for the remarkable journey we continue to share.

This term has been one of resilience, growth, and hope. From academic achievements to the discovery of new talents, from progress on our school farm to the inspiring success of our scholars in higher learning institutions, each milestone reflects what can be accomplished when hearts and hands unite in purpose. Your unwavering support has not only sustained our school but has encouraged our learners to believe in their potential. You have shown them that they are seen, valued, and capable of becoming leaders who will shape their communities and beyond.

We were especially blessed this term to welcome friends from across the globe, from the United States to Japan. A total of 24 mission team guests visited Nambale, generously sharing their time, love, and resources with our community. Hosting them was a true joy, and we trust they returned home inspired and encouraged by the impact of the work taking place here.

As we look ahead to the final term of this year, we remain steadfast in our mission: to educate, nurture, and empower. With your continued partnership, the seeds we are planting will grow into a lasting legacy of transformation for generations to come.

With heartfelt appreciation,

Rev. Evalyn Wakhusama
Founder and Director
Nambale Magnet School

A MESSAGE FROM THE HEADTEACHER

Dear Esteemed Partners,

As we close Term II 2025, I extend my heartfelt gratitude for your steadfast support. Your partnership continues to transform the lives of our learners and uplift the wider community in profound ways.

This term, Nambale Magnet School has made remarkable strides. With a strong commitment to providing safe, inclusive, protective, and lifelong education, our learners have excelled in academics, co-curricular activities, and community engagement. These milestones are a true reflection of the dedication of our teaching staff and the resilience of our students.

We are also delighted to share that our current school population now stands at 565 learners an encouraging sign of the growing trust families place in Nambale Magnet School. Together, we remain committed to nurturing well-rounded, confident, and future-ready young leaders.

With deep appreciation,

Mr. James Juma
Headteacher
Nambale Magnet School

HIGHLIGHTS FOR TERM TWO 2025

ACADEMIC EXCELLENCE

The school has recorded excellent academic performance this term, with learners showing notable improvements in both assessments and evaluations. Teaching and learning have remained a top priority, supported by the dedication of staff and the determination of students. To further enhance outcomes, a series of productive workshops were held, stimulating the teaching and learning process and equipping both teachers and learners with practical strategies for success. These efforts have contributed significantly to the strong academic progress witnessed this term.

ENROLLMENT AND STAFFING

TOTAL ENROLLMENT OF LEARNERS:

565

ECDE (Play Group to Pre-primary 2): 113 learners
Lower Grade (Grade 1 to 3): 151 learners
Upper Grade (Grade 4 to 6): 155 learners
Junior School (Grade 7 to 9): 146 students

STAFFING:

29

Total number of teachers that serve across all categories, ensuring learners receive quality education and mentorship.

CO-CURRICULAR ACTIVITIES

Beyond the classroom, Nambale Magnet School continues to nurture well-rounded learners by encouraging participation in co-curricular activities.

- **Music Festivals:** Our learners proudly represented the school at the regional level, showcasing their exceptional talent, creativity, and discipline.
- **Soccer:** The school soccer team excelled at the cluster level, with outstanding individual performances. Notably, Patrick Asike, Dalvin Etoo, and Sheyline Akinyi qualified to represent the school at the county level, a remarkable milestone that reflects both skill and teamwork.

VISIT FROM MISSION TEAMS

We were honored to host over **24 mission team guests** from across the globe who generously shared their experiences, resources, and time with the Nambale community. Their presence brought encouragement, joy, and renewed energy - reminding our learners and staff that they are part of a wider family that believes in their potential.

During this mission trip, we were especially blessed to receive a generous **donation of USD 16,000** from the team. This support will go a long way in strengthening our programs and ensuring that our learners continue to thrive academically, socially, and spiritually.

Visitors and farmers during a hands on training

OTHER ACTIVITIES

Cluster champions: Felistus 4*4 relay, Sheyline 100m, Yvettey triple jump, Dalvine Discus and Patrick javelin

Girl's Soccer players

Singing games participants

First Aiders

Volleyball boys - Primary

FARMiNG

Vegetable Section

The vegetable section produced sufficient supply to sustain the entire term, with surplus sold after schools closed. Towards the end of the term, the team had already begun planting vegetables in preparation for Term Three, ensuring a smooth transition into the short term ahead.

Dairy Unit

The dairy unit welcomed two new calves, increasing milk production from 30 litres last term to 40 litres this term. This surplus is currently being sold over the holiday.

Poultry Unit

All laying birds have now been moved to cages, resulting in increased production from 75 trays of eggs per day last season to 106 trays this term, with a target of 125 trays at peak laying.

Piggery

The piggery continues to be a reliable source of meat for the school. We currently have 26 pigs, with four expectant sows due to deliver at the end of August.

Fodder Production

The hay farm has been expanded from four acres to five acres, with the additional acre set to be planted during the upcoming short rains in August.

Other Crops

The farm successfully harvested finger millet, soya, and beans this season, aided by the use of frass fertilizer and organic foliar from the BSF (Black Soldier Fly) unit.

Black Soldier Fly (BSF) Unit

The BSF unit remained a vibrant hub of activity and learning, attracting farmers and visitors from various counties who came for benchmarking and training. Each team received a three-day hands-on training at our facility, along with starter packs. The unit relocated to a larger facility, positioning us to significantly increase fertilizer and larvae production.

TRAINING & PARTNERSHIPS

Our farm continues to be recognized as a strong learning environment for practical agricultural training. This term, we hosted:

- **3** students from Bukura Agricultural Training College
- **1** student from Bungoma National Polytechnic
- **1** student from Okame Training Institute

These students successfully completed their three-month industrial attachments ending on 15th August. We are already scheduled to host three students from Chamasiri Technical & Vocational College beginning 1st September 2025.

CHALLENGES

- **Labour Needs:** The expansion of the BSF unit has increased workload significantly. With only two staff handling both the unit and greenhouse activities, additional labour is urgently needed.
- **Pig Feeds:** New feeds introduced for pigs were not well received, forcing us to revert to concentrate feed on a reducing scale until adaptation improves.
- **Crop Variety:** A poor variety of collard seeds led to rot after one harvest, nearly causing a supply shortage for the school kitchen

CONCLUSiON

The Nambale Magnet School continues to stand as a living classroom, a sustainable food source, and a hub of innovation nurturing not only the minds and hearts of our learners, but also uplifting the wider community.

Your continued trust and investment in our vision have been central to every step of this journey. Because of your support, we are able to educate confident, skilled, and community driven young leaders while advancing bold solutions in sustainability and self reliance.

Thank you for believing in this mission and walking alongside us.
